

# Growth Management and Transportation

---

## Background

WSDOT contracted with Community Trade and Economic Development (CTED) over a three-year period ending June 2005 to work on the connections between Washington State Growth Management and transportation.

Two different staff persons from CTED worked with WSDOT during that time. A number of products were produced, the first one being a white paper.

The white paper was a result of issues raised in the TPEAC Planning Subcommittee, which met from January 2002-January 2003. The white paper embodies many of the issues the Planning Subcommittee grappled with.

## Products

- White paper on Growth Management Act and WSDOT planning and environmental assessment requirements finalized spring of 2005
- Map and matrix of states with state environmental programs and/or growth management programs
- Listing of resources
- Draft webpage with frequently asked questions

## Current Status

All products will become part of the webpage. The webpage will be available on the Internet. The main audience is WSDOT planners and local agency planners. TPEAC members will be notified when webpage is launched.
